MAINTAIN ITS ABOUT TIME

Technology is a significant investment, and it pays to have a partner who can help you minimize costly downtime. NStep Solutions can partner with your organization, working closely with you to resolve maintenance problems quickly and smoothly.

Whether you need support for large, mission-critical environments or non-critical systems, where downtime does not impact productivity or revenue, we offer a choice of online, telephone-based or optional on-site service

WE PLAN, YOU PROSPER

The value of NStep Solutions starts with our understanding your core business and technology challenges. By harnessing the latest standards-based platforms, we simplify your operations while helping to minimize expenses and disruptions to your flow of business. The end result is a more efficient, effective, scalable and productive organization. Our offerings are extensive and they all focus on you.

Making your small business
better through technology...

BUSINESS CHALLENGE

Today, infrastructure uptime and performance optimization are key to a company's success. Companies are focused on cost containment and optimal network performance while managing their IT investments and supporting business objectives. Network services need to offer unparalleled advantages both technically and through demonstrated business value, especially delivering an intelligent network infrastructure. Changes must provide more functionality and features to address business computing needs and many organizations are considering other means to run their business.

All this while providing single accountability and real-world experience for services. The objective must be to provide a LAN infrastructure "health check" designed to analyze the integrity of the current network infrastructure, establish a performance baseline for the current network, and identify any problem areas. Companies are focused on cost containment and optimal network performance while managing their IT investments

and supporting business objectives. NStep Solutions provides the expert knowledge and the resources to get your new systems up and running quickly. Our Certified Technicians use proven methodologies to minimize installation time. We give you a wide range of standard Client and Enterprise Installation options to meet your specific needs, no matter how big or small your operations are, providing you with a single point of contact.

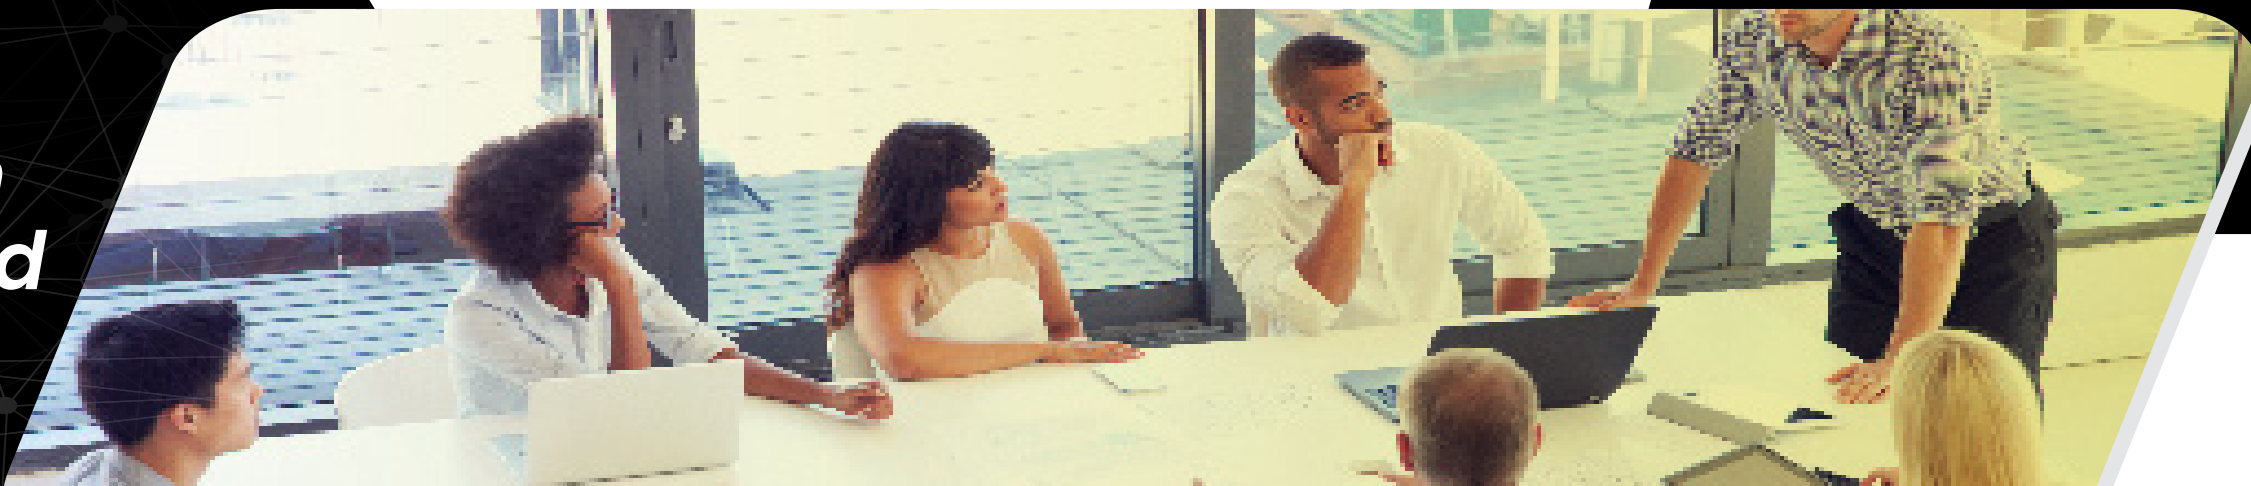

CAPABILITIES

- 1-** We offer network planning, implementation, and system integration services, along with remote user access for wireless and LAN environments. Our team uses scalable technologies and products from leading companies such as Cisco, Linksys, Westell, and USBLink, as well as Enterasys Switches & Hubs, network firewalls, and NAS storage systems.
- 2-** Our solutions include and build customisable solutions for your in-place software products. Our team is experienced in establishing database operatives for SQL Server 2022, Zen v15 SP2 (15.20), Oracle Database 19c, SAP S/4HANA 2022, and Microsoft Power Platform.

3- We're your trusted source for cutting-edge cybersecurity solutions. Our team harnesses the power of advanced security software, including industry leaders like Cisco, Norton, and Fortinet, to fortify your digital defenses. Your security needs are our top priority, and we're dedicated to providing the most secure and up-to-date solutions available.

4- We specialise in network planning, implementation, and system integration services, using scalable technologies and products from leading companies such as Cisco, Microsoft, and Amazon Web Services. Our team is proficient in configuring modern operating systems such as Windows 10, macOS, and Linux, as well as cloud-based solutions such as Microsoft Azure and Google Cloud
